

Technical drawing of the "FRISIAN FAMKE" ship hull, showing dimensions and cargo capacity. The drawing includes a side view of the hull and a cross-section view of the cargo hold.

Dimensions:

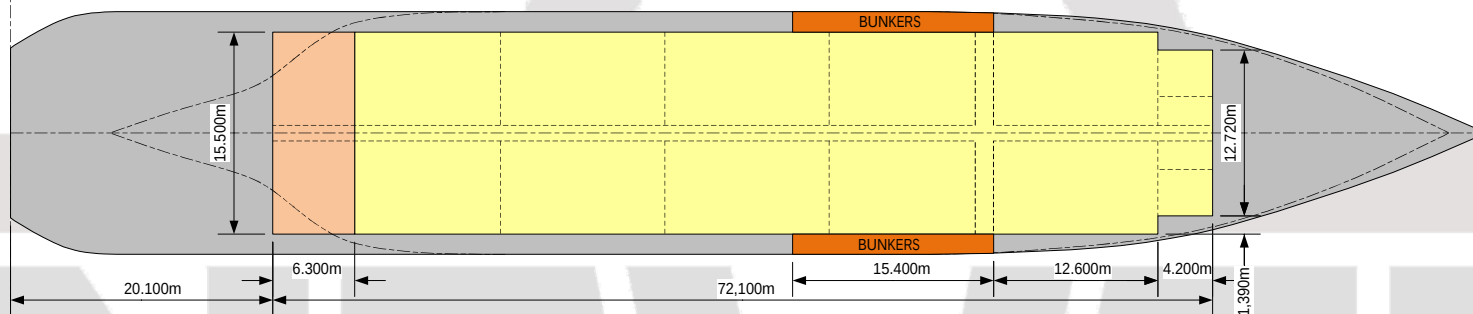

- Overall length: 128m
- Overall height: 55.152m
- Height of the cargo hold: 33.254m
- Height of the cargo hold (cross-section): 5.600m
- Height of the cargo hold (cross-section): 2.400m

Cargo Capacity:

- Overall capacity: 13900 m³ (490800 cft)
- Capacity of the cargo hold (cross-section): 840 m³ (29656 cft)
- Capacity of the cargo hold (cross-section): 1610 m³ (56857 cft)
- Capacity of the cargo hold (cross-section): 3078 m³ (108699 cft)
- Capacity of the cargo hold (cross-section): 989 m³ (34926 cft)
- Capacity of the cargo hold (cross-section): 989 m³ (34926 cft)
- Capacity of the cargo hold (cross-section): 2139 m³ (75538 cft)
- Capacity of the cargo hold (cross-section): 2139 m³ (75538 cft)
- Capacity of the cargo hold (cross-section): 1992 m³ (70347 cft)

Frame Spacing:

- FRAME SPACING 600mm
- FRAME SPACING 700mm

The diagram illustrates the deck layout of a ship, showing various compartments and their dimensions. The layout is divided into several sections:

- Forward Section:** A compartment measuring 13.800m in length and 15.500m in width.
- Mid-Section:** A series of compartments labeled GRS1 through GRS10, each measuring 6.300m in length. These are followed by two compartments labeled TDL, each measuring 4.200m in length.
- Aft Section:** A compartment measuring 1.390m in length.
- Overall Dimensions:** The total length of the ship is 78.400m, and the total width is 12.720m.
